

# VILLA

## Agrostis stolonifera

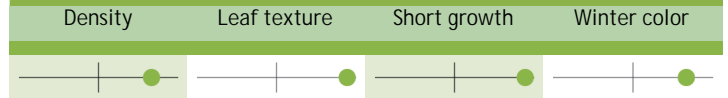

## Velvet bentgrass

For golf greens or luxury lawns

- High turf quality
- Excellent winter color
- Heat/drought tolerant
- Rapid establishment

### Rating

### Quick Facts

VILLA is an elite velvet bentgrass used primarily on golf course putting greens. Villa's turf quality is outstanding, and its overall resistance to disease and pests is excellent. It is rated #1 in the 2002 NTEP Trials against brown patch. Villa out-performs many other varieties with its abundant summer and fall density, remarkable winter color and fine texture. If you're looking for top quality turf that will be both beautiful and durable all year long, Villa is unsurpassed.

VILLA was developed exclusively for home lawns; golf course greens, tees and fairways; croquet and tennis courts and bowling tops. Villa is also used as a minor component in winter overseed mixtures containing *Poa Trivialis*.
