

TECH SHEET

FINE TEXTURE

HEAT TOLERANT

LESS FERTILIZER

GOOD DENSITY

RAPID ESTABLISH.

QUICK FACTS

Cobra 2 creeping bentgrass is an exceptionally dense growing variety with good resistance to major turfgrass diseases including brown spot and dollar spot. These traits, along with its attractive color and early spring greenup, provide golf courses with superior greens. Cobra 2 maintains its excellent performance even under high traffic conditions - an advantage appreciated by both players and greenskeepers.

ADAPTATION

Cobra 2 was developed exclusively for golf course greens, tees and fairways; croquet and tennis courts, and bowling tops. Cobra 2 is also used as a minor component in winter overseed mixtures containing improved Poa Trivialis.

Creeping Bentgrass

- ✓ SUPERIOR TURF QUALITY
- ✓ EXCELLENT WINTER COLOR
- ✓ GOOD DISEASE RESISTANCE
- ✓ HEAT/HUMIDITY TOLERANT
- ✓ RAPID ESTABLISHMENT

TRIAL DATA

2005 NTEP Trial
Amherst, Massachusetts

Turf Quality

	Mean
Cobra 2	6.3
Memorial	6.2
Penn A-1	6.0
T-1	6.0
Declaration	5.9
Pennlinks II	5.6
Penncross	5.3

Scale: 1-9; 9= Best

SEEDING RATES

New Plantings:
1/2-1 lb per 1000 sq ft
or 150-220 lbs./ac

Interseeding:
2-3 lbs per 1000 sq ft
or 90-150 lbs./ac

Growth Habit	Estab. Rate Days	Low Mow tol. <3/16"	Mowing Frequency	Traffic Tol. (Brinkman)	Nitrogen Required	Shade Tolerance	Cold Tolerance	Drought Tolerance	Endophyte Enhanced	Salinity Tolerance
