

FINE LEAF TEXTURE

COLD TOLERANT

LOW MAINTENANCE

SHADE TOLERANT

LESS FERTILIZER

QUICK FACTS

EUREKA II is a deep dark green, dense, slow growing bunch grass that spreads slowly with basal tillering. Once fully established it requires little supplemental irrigation or fertilizer and tolerates acidic, infertile shady planting sites. Eureka II was entered in the 1998 Fine Fescue NTEP Test along with 78 fine fescue and 22 chewing fescue varieties. Data from the 2000 Progress Report indicates that Eureka II tied for 3rd in turf quality and 1st in color among hard fescue varieties. It also exhibits strong disease resistance.

ADAPTATION

EUREKA II is best utilized in polyspecies turfgrass mixtures for improved shade tolerance, low height of cut and reduced maintenance. It can be utilized in winter overseeding programs as a minor component in rapid transition turfgrass mixtures. It is compatible with Kentucky bluegrass, perennial ryegrass, colonial bentgrass and other fine fescues.

Eureka II

Hard Fescue

- FINE TEXTURE
- SLOW GROWTH
- DARK GREEN COLOR
- DISEASE RESISTANT
- GOOD SHADE TOLERANCE

TRIAL DATA

2000 NTEP Trial
Fine Fescue Color

Tested at 28 locations
in the US & Canada

	MEAN
EUREKA II	7.2
RESCUE 911	7.2
