

RAPID ESTABLISH.

DROUGHT TOLERANT

ENDOPHYTE ENHANCED

WEAR TOLERANT

DISEASE RESISTANT

Stamina

Perennial Ryegrass

QUICK FACTS

STAMINA (IS-PR 479) is on parade as a very wear tolerant perennial ryegrass with added value for recovery from drought. Highly resistant to brown patch, Stamina will live up to its name as a quality turf in response to disease pressure and environmental stresses, which is increasingly important in the world of climate change. Stamina is naturally endophyte enhanced, inherently repelling surface feeding insects and subsequent vulnerability to disease and stress.

ADAPTATION

STAMINA is valued for use in areas of high traffic where tolerance to wear and quick recovery are critical. Perfect for parks, sports/athletic fields and other high use venues as a straight or in blends, and mixtures where perennial ryegrass is an acceptable component. Stamina is highly valued for overseeding dormant bermudagrass in the south and arid regions, where it extends use and aesthetics longer.

- ✓ SUPERIOR TURF QUALITY
- ✓ VERY WEAR TOLERANT
- ✓ QUICK RECOVERY
- ✓ BROWN PATCH RESISTANT
- ✓ DROUGHT TOLERANT

TRIAL DATA

2010 Perennial Ryegrass NTEP
2011 Data

TOP 10

- Mean Turfgrass Quality
- % Cover After Wear (PA)
- Mean Quality After Drought (WA)
- Mean Quality Overseeding (AZ)
 - Brown Patch Resistance
- Maximum Top 25% for all trials

SEEDING RATE

7-10 lbs per 1,000 sq ft
